

*Xeni Dassiou*

Dr Xenia Dassiou is a Reader in Economics and the Director of the Centre for Competition and Regulatory Policy (CCRP) at the School of Social Sciences at City University, London. She has a long experience in training professionals on the practice of regulation and competition policy and is regularly exposed to the types of issues raised in this type of training both in her role as a lecturer and as the programme director of the MSc in Economic Regulation and Competition run by the department of Economics at City University since 1997.

She has given numerous invited talks on behavioural issues in regulation and has organised several CCRP workshops in academic institutions in the UK and abroad as well as edited journals on topics in regulation in infrastructure utilities and competition in modern market structures in her capacity as the Director of the CCRP.

Her research interests lie in the area of industrial organisation theory and competition policy and she has worked in this area for the last 20 years. She has written numerous papers on the economic theory of bundling as an instrument of price discrimination, both on a mathematical platform (e.g. *Journal of Mathematical Economics*, 2008) as well as on the economic policy related implications of bundling in government procurement and financial regulation. She has also worked on modeling the formation and updating of trust perceptions in infrastructure contracts, the role of herding in determining managerial and investment behaviour (e.g. *Economica*, 2000), and the impact of failed mergers on the returns of UK companies involved in such mergers.
